

# Sales Dashboard & Forecasting Presentation

Using Power BI & Tableau

**Objective →** This Presentation will help to understand, use, visualize, & interact with the dashboard & give basic Knowledge about it.

## What is Dashboard?

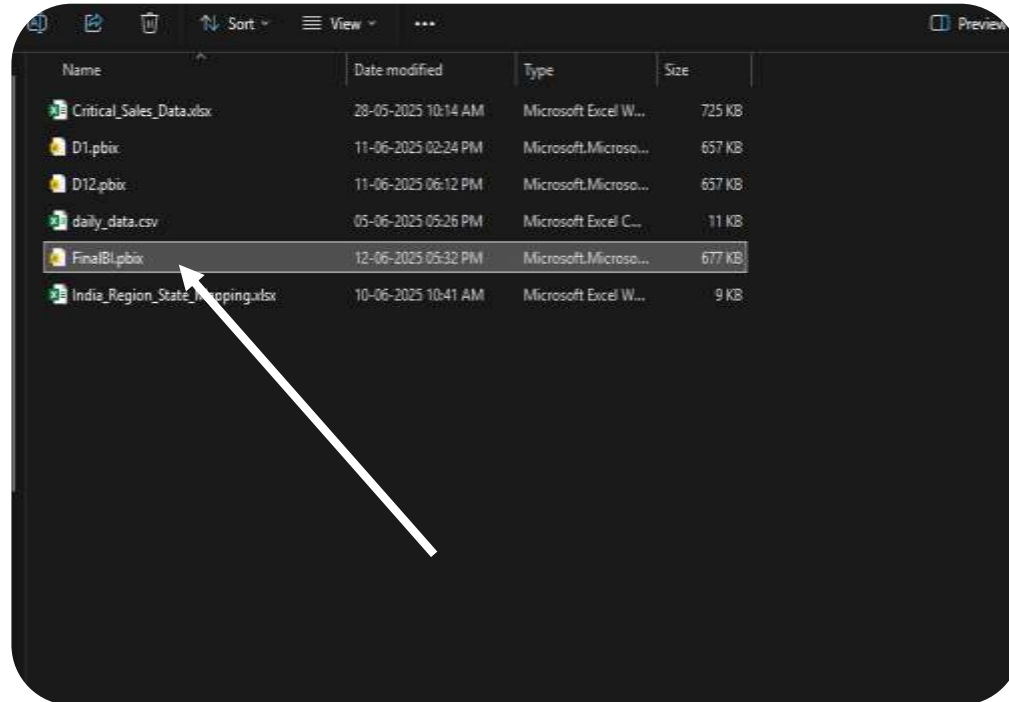

- Dashboard is a visual interface to analyze and understand your data easily.
- Helps in tracking Key Performance Index, trends, customer activity, etc.

## How to Open & Use it ?

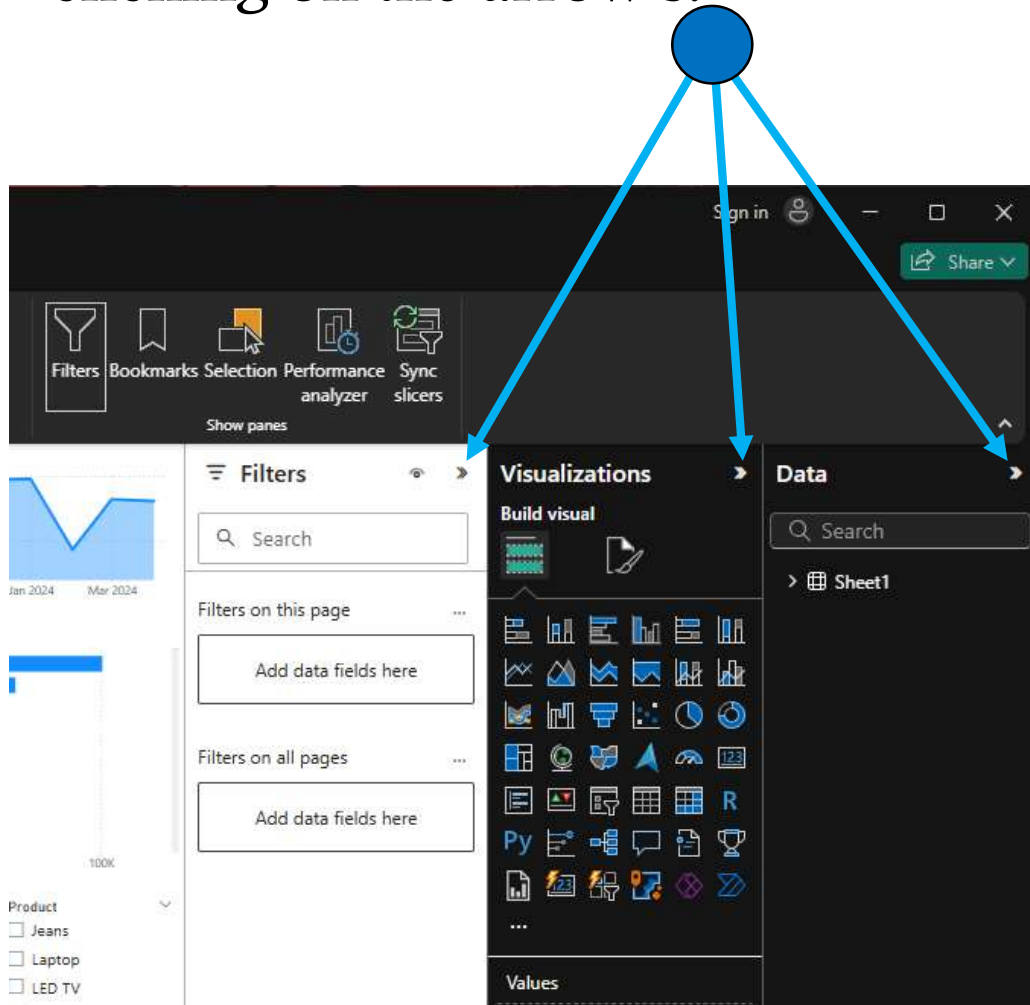

- Provided Dashboard are in two formats – .pbix & .twbx  
.pbix format file is PowerBI Dashboard & can open from PowerBI.  
.twbx format file is Tableau Dashboard & can open from Tableau.  
Both tools can show Real Time Data on Website.

# Power BI:

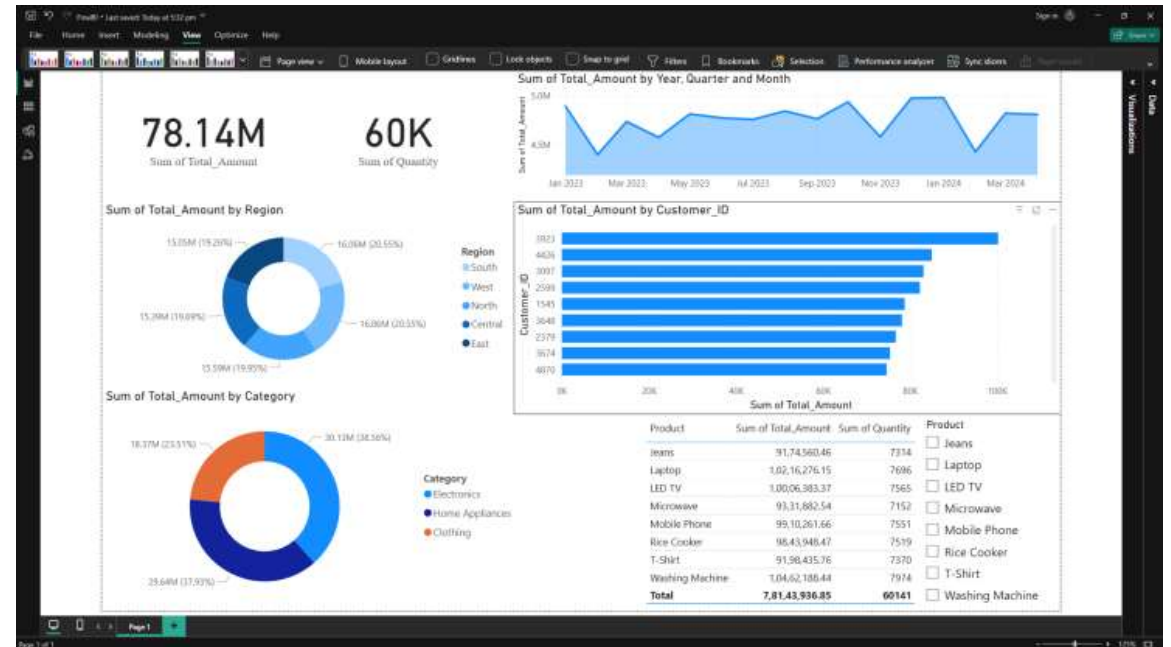

- Download PowerBI from the Microsoft PowerBI Website or from Microsoft Store.
- You can open **.pbix** file in Power BI Desktop (free).
- Or publish & view online in Power BI Service (need work account)
- **STEPS** : Just Double click on the .pbix file **after Installing PowerBI** to view in the tool.

- Collapse the Filters, Visualization, Data tabs for better view in PowerBI desktop by clicking on the arrow's.

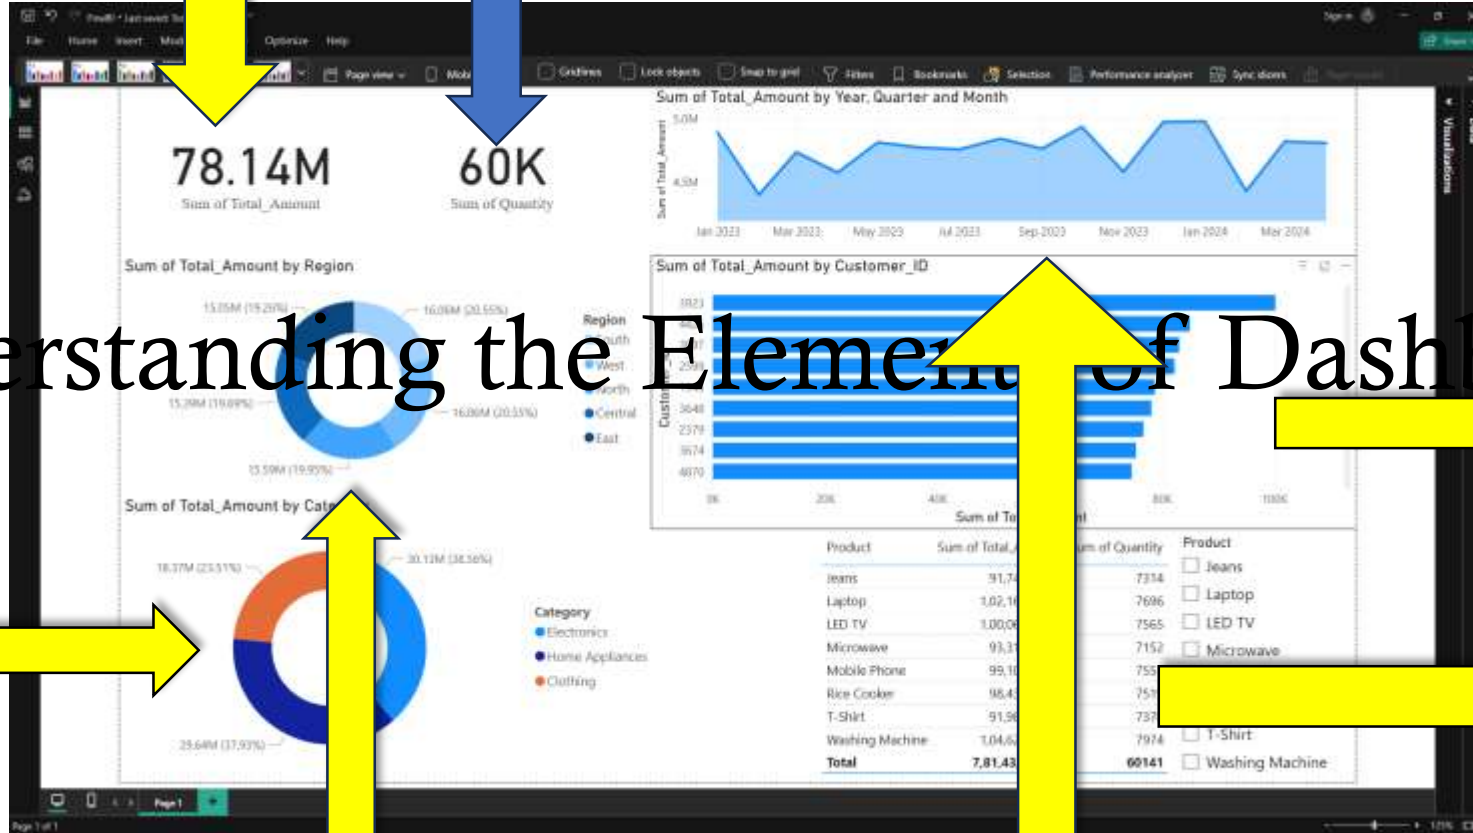

Data PowerBI does not contain any presentation mode so this will help to get better view.

Total Revenue Generated = Total Units Sold \* Price of all categories = Electronics Revenue + Home Appliances Revenue + Clothing Revenue

# Understanding the Elements of Dashboard

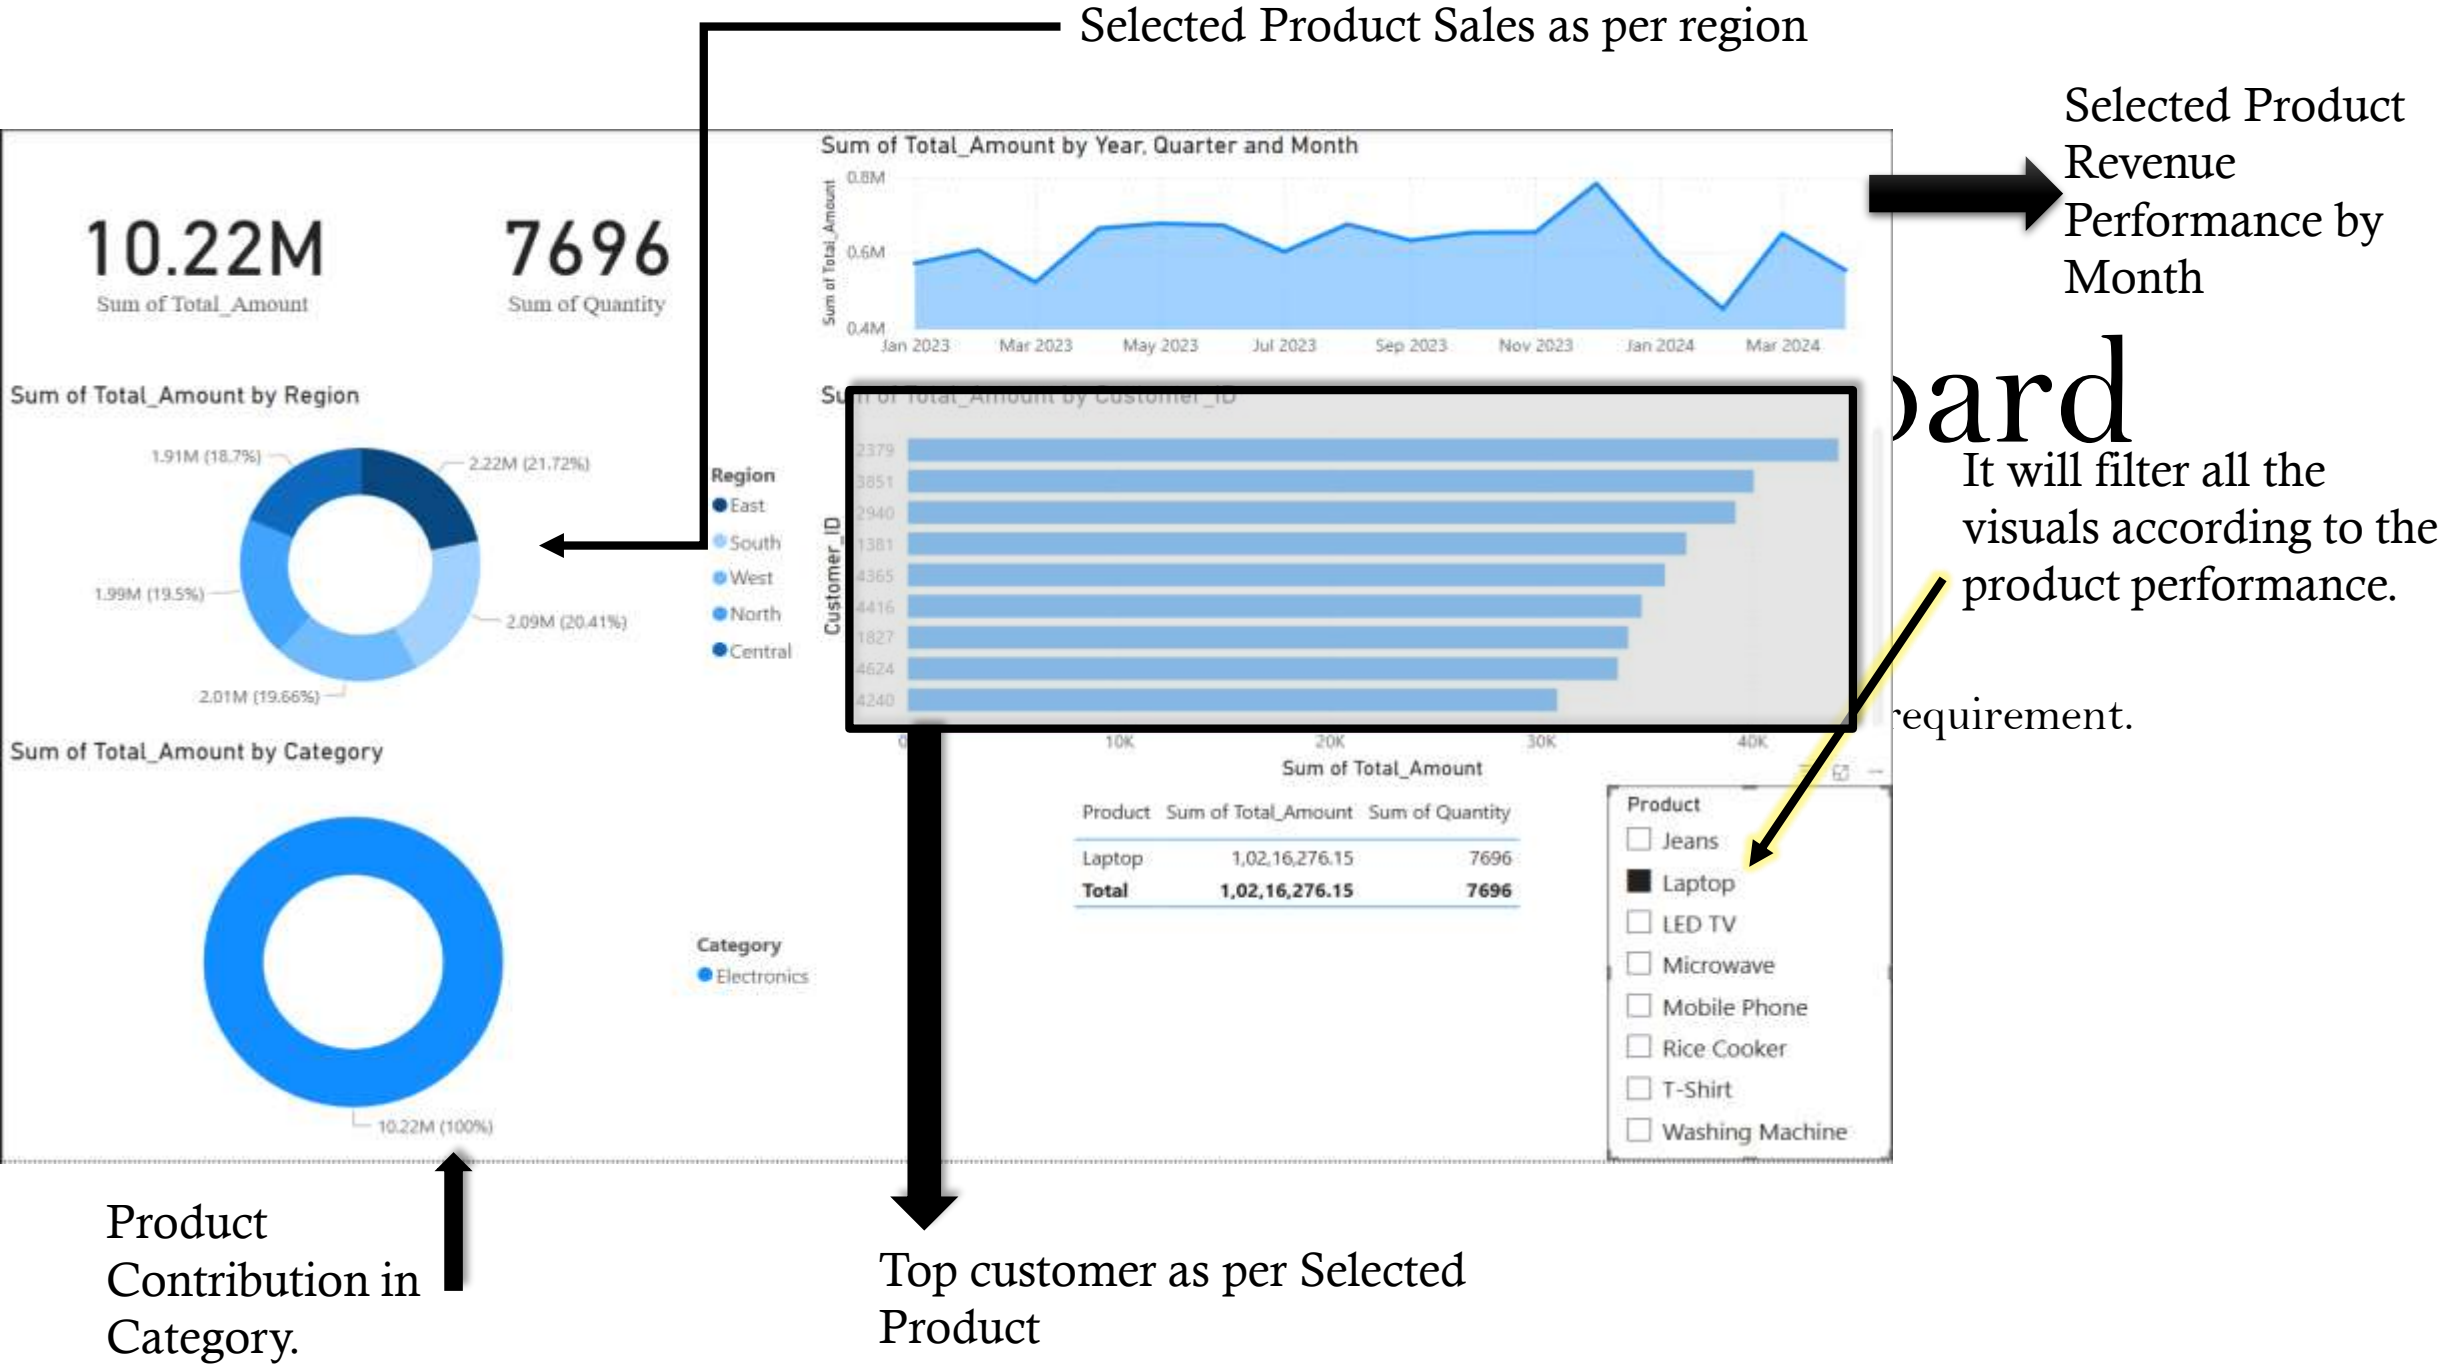

Top Customer.

Revenue & Units sold, Product Wise

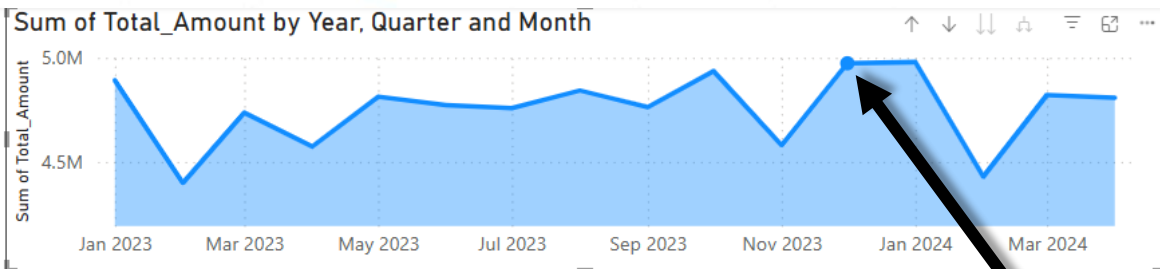

Revenue Generated Category wise.

Revenue Generated per region

Revenue Timeline by Month = Total revenue Generated per month

Sum of Total\_Amount by Year, Quarter and Month

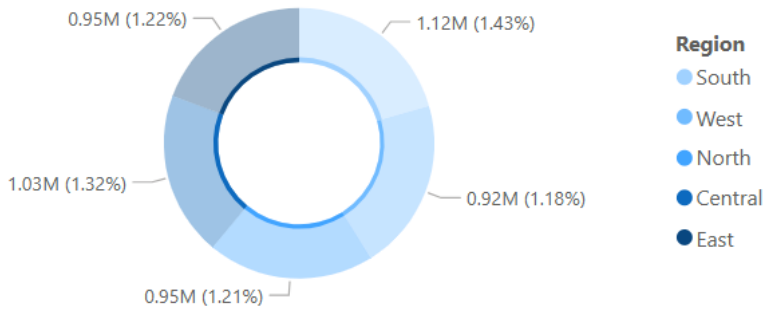

4.97M

Sum of Total\_Amount

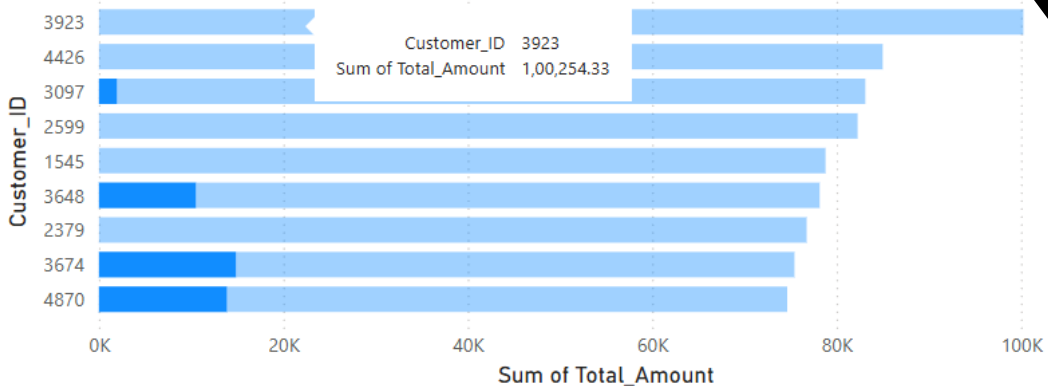

3774

Sum of Quantity

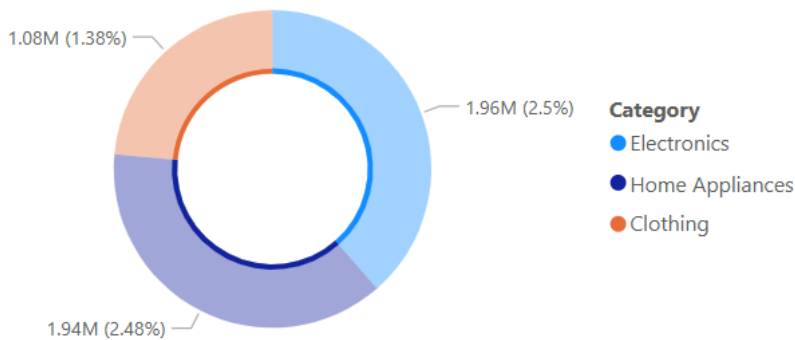

S Sum of Total\_Amount by Region

Sum of Total\_Amount by Customer\_ID

S Sum of Total\_Amount by Category

| Product         | Sum of Total_Amount | Sum of Quantity |
|-----------------|---------------------|-----------------|
| Jeans           | 6,02,812.81         | 464             |
| Laptop          | 7,83,889.96         | 581             |
| LED TV          | 6,14,440.87         | 415             |
| Microwave       | 6,03,534.60         | 472             |
| Mobile Phone    | 5,59,078.73         | 433             |
| Rice Cooker     | 7,06,172.39         | 541             |
| T-Shirt         | 4,77,512.06         | 386             |
| Washing Machine | 6,25,857.37         | 482             |
| Total           | 49,73,298.79        | 3774            |

- Product
- ☐ Jeans
  - ☐ Laptop
  - ☐ LED TV
  - ☐ Microwave
  - ☐ Mobile Phone
  - ☐ Rice Cooker
  - ☐ T-Shirt
  - ☐ Washing Machine

Performance By Month

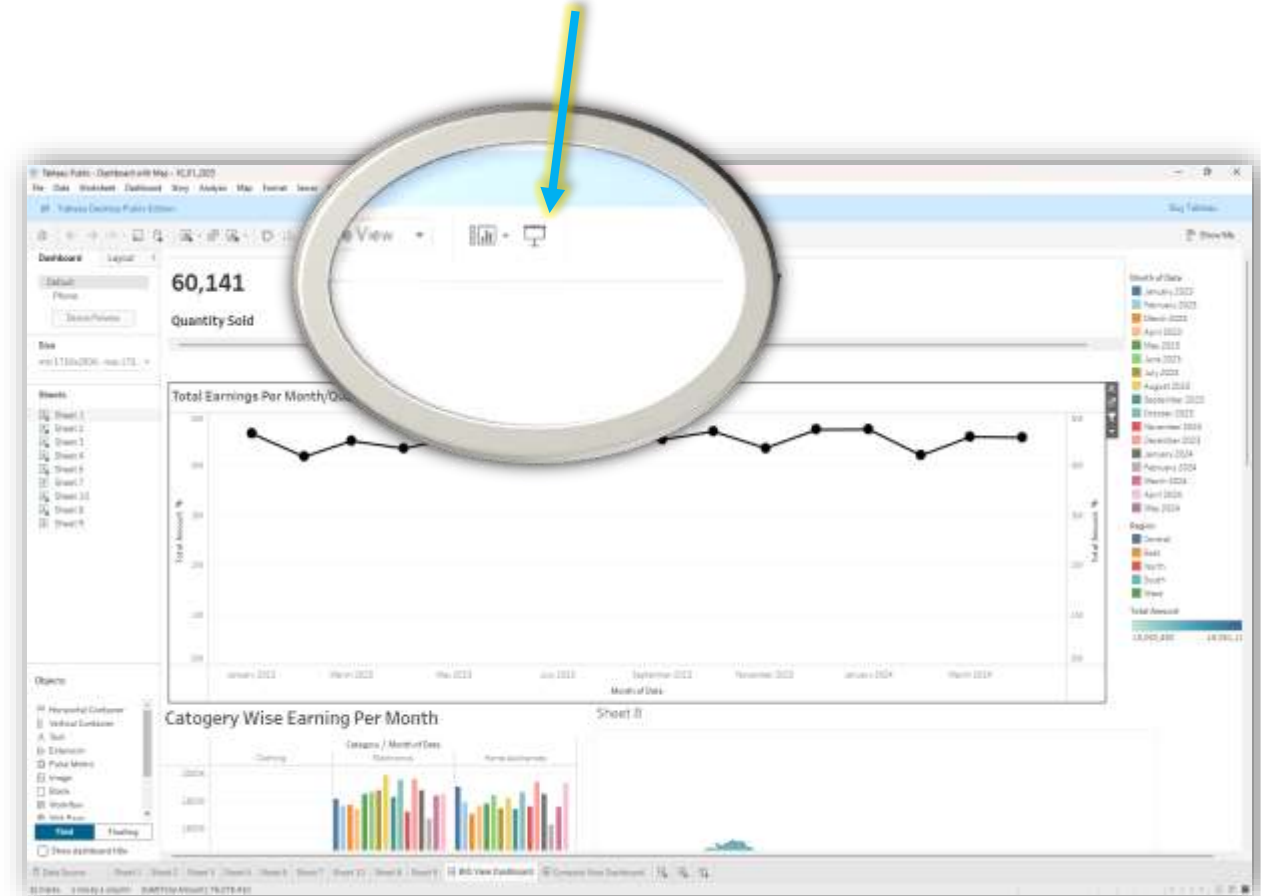

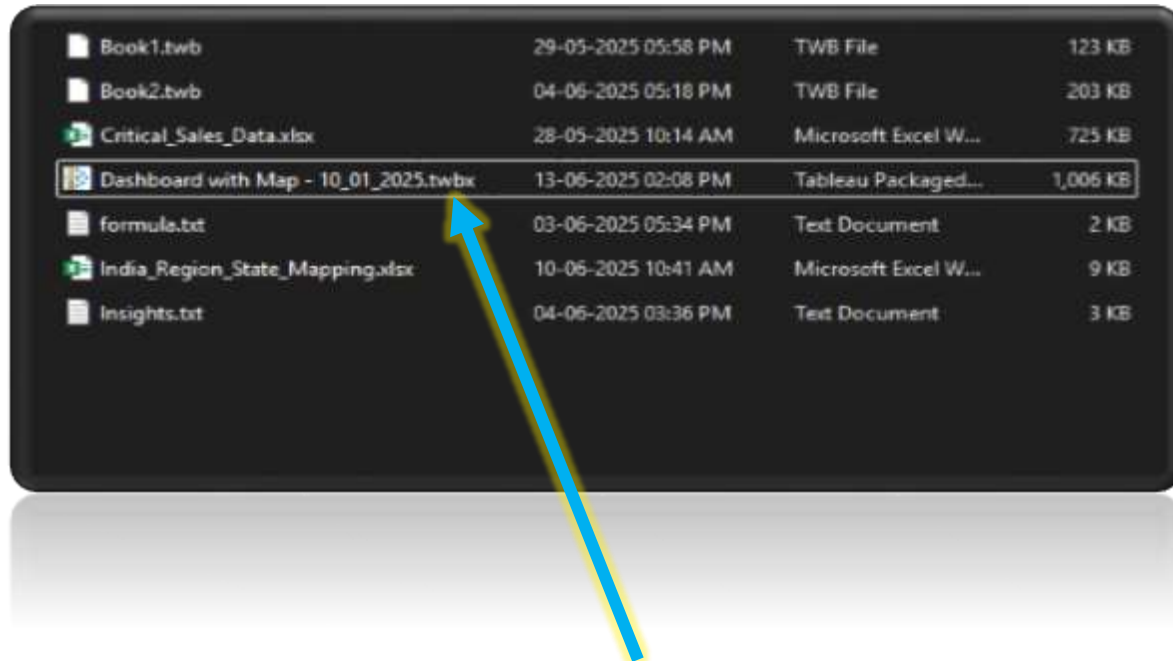

Visuals as per Customer

Visuals As per Product Category.

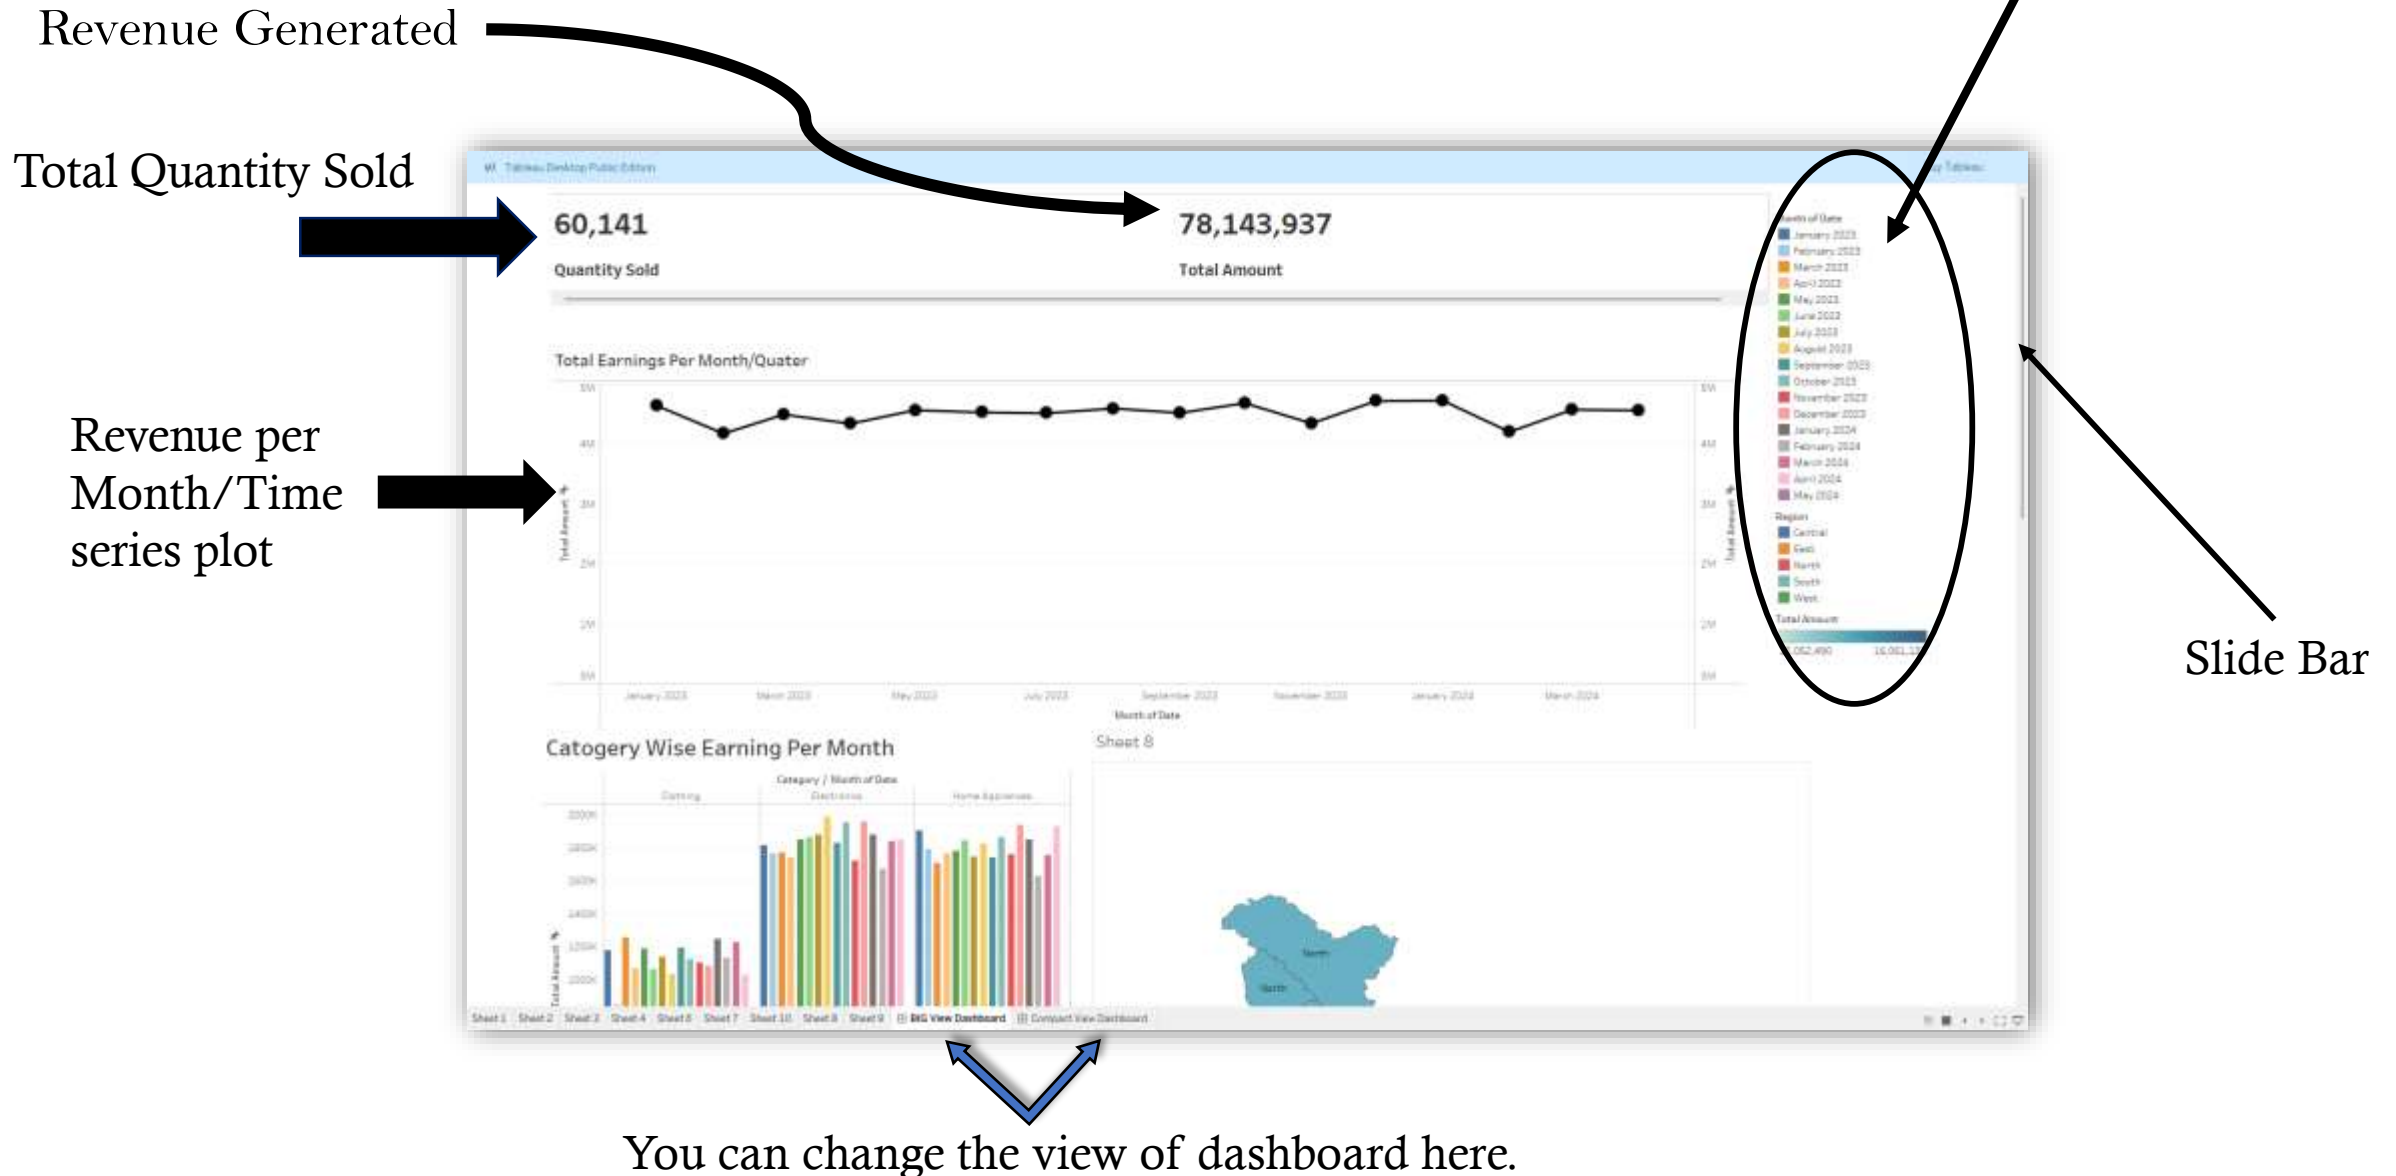

# • Tableau:

- Open **.twbx** file in Tableau Public Desktop in presentation mode ( free ), but need license for Tableau Private.
- Or view online using Tableau Public ( free ) / Tableau Server ( need to purchase )
- **STEPS** : Just Double click on the **.twbx** file **after Installing Tableau** & open Presentation mode ( Press F7 ).
